SUMMARY

I am a Software developer with two years of experience. I challenged to creating software that solves real-world problems and turning ideas into functional solutions and always eager to learn. I continuously seek opportunities to expand my expertise in backend development.

EDUCATION

Hasanuddin University (Aug 2020 - Feb 2025)
Bachelor of Engineering in Informatics Engineering - GPA: 3.76 out of 4.00

EXPERIENCE

Backend Developer at MyBuild   **Feb 2025 - Aug 2025**

- Using Typescript, improving response times by up to 20% and reducing maintenance issues by 30%.
- Designed and developed REST APIs, enabling key product features and improving feature delivery speed by 40%.
- Refactored and expanded database schemas, reducing query complexity by 20% and supporting scalable growth.

Backend Developer Internship at GoDentist   **Aug 2024 - Oct 2024**

- Built efficient backend systems to enhance overall application performance.
- Optimized key APIs, improving response times by 20%.
- Developed backend APIs for a Progressive Web Application (PWA) using JavaScript.

Fullstack Developer at Unit Kerja Khusus Laboratorium & Sains Universitas   **Jan 2024 - Aug 2024**
Hasanuddin

- Built and optimized user flows for clients and multiple laboratory heads, ensuring smooth coordination in ordering and renting laboratory equipment and services.
- Streamlined the ordering workflow, and improving overall user satisfaction.
- Developed a full-stack web application using Laravel and integrated the frontend with React.js

Fullstack Developer at Software House Hanami Game Studio   **Mar 2023 - Sept 2023**

- Optimized API efficiency, improving overall response speed and system performance by 20%.
- Collaborated with cross-functional teams, enhancing development workflow and reducing delivery bottlenecks by 15%.
- Translated client requirements into clear, functional software solutions that met project goals.

Backend Developer Internship at Kioser- Makassar, Indonesia   **Feb 2022 - Mar 2022**

- Optimized API performance, increasing efficiency by 15% across key endpoints.
- Designed and implemented scalable RESTful APIs using Golang to support new system features.
- Developed an automated WhatsApp chatbot using Lumen, improving communication speed and reducing manual workload by 20%.

SKILLS

- Programming Language: JavaScript • TypeScript • PHP • Go
- Framework/Libraries: ExpressJs • Laravel • Gin • React
- Database Management System: MySQL • PostgreSQL
- Docker
